

Academia Integration – Fit for the Job Market Semi-Intensive A1 to B1

Academia Integration offers the “Fit for the Job Market” semi-intensive German language course at Zurichstrasse 131 in Dübendorf and Grüzefeldstrasse 34 in Winterthur. This course targets adolescents and young adults (16–25 years), adults, and school-going individuals who find intensive courses too demanding due to time constraints or the challenge of the content. The offer emphasizes everyday communication and integration into the Swiss working environment, with each half-level (A1, A2, B1) completed in a semester. Childcare is available, making the program accessible for parents, and the course runs full days with 10 lessons per week over 15 weeks (with a total duration of 15–17 weeks per half level, adjusted individually as needed). Entry is possible throughout the year, and each course module costs CHF 2,550 (plus a mandatory CHF 80 for materials). Optional childcare is available for CHF 12 per hour. The program is IAZH-accredited, and participants receive a certificate and an individualized assessment of their progress.

Academia Integration – ICT Educational Module

The ICT Educational Module from Academia Integration is designed to equip participants with essential computer and MS Office skills needed for successful vocational training and integration into the Swiss job market. Courses are held at both Dübendorf and Winterthur locations and target adolescents, young adults (16–25 years), and adults, though childcare is not provided. The program runs at 4 lessons per week for 22 weeks per unit, and can be started at any time during the year. The curriculum includes modules for different education levels and can be combined with German or mathematics courses. Each ICT module costs CHF 2,376 plus a mandatory CHF 80 for teaching materials. This offering is IAZH-accredited and ensures that participants acquire job-relevant digital skills.

Academia Integration – Literacy

Academia Integration’s literacy program is tailored for individuals who have never learned to read and write, either in their native language or using the Latin alphabet, as well as for those with insufficient skills for regular language courses. The course takes place at both Dübendorf and Winterthur, focusing on adolescents, young adults, adults, and even those experiencing mental stress. Childcare is available, supporting parents’ participation. The program consists of 15 lessons per week for 10 weeks for each course section (basic, advanced, consolidation, and post-literacy), with ongoing entry throughout the year. Each course module is priced at CHF 3,000, with a CHF 80 mandatory materials fee and optional childcare at CHF 12 per hour. The literacy offer is

IAZH-accredited, and a free assessment ensures correct placement at the appropriate level.

Academia Integration – Mathematics

Academia Integration's mathematics educational module is aimed at providing participants with the fundamental math skills necessary for vocational training and job market integration in Switzerland. The program is held at Dübendorf and Winterthur and is open to adolescents, young adults (16–25 years), and adults, but does not offer childcare. Participants engage in 4 lessons per week for 22 weeks, with courses covering a wide range of levels, from basic primary to high school mathematics, tailored to individual needs. Entry is continuously possible, and each educational module costs CHF 2,200 plus a mandatory CHF 80 for materials. The course is IAZH-accredited and can be combined with other integration modules such as ICT or German, supporting participants in building robust job-market relevant skills.
